

SMTC partner with Innovative companies to bring their Product and Technology to life.

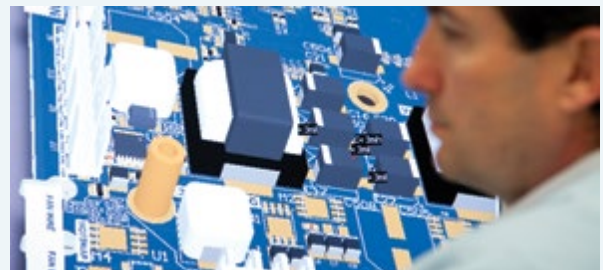

Located in the heart of Silicon Valley SMTC's specialized technology center and IDNEO's engineering team provides design expertise for proof of manufacturability, Prototyping and NPI into mass production. This high mix, low to medium volumes 'Copy-Exact' facility servicing OEMs in the Western U.S. requiring low-cost North American manufacturing services.

Our exclusive '**Innovators Advance**' program enables customers to engage with key expertise at the early stages of the idea to ensure success, significantly reduce risk and empowers innovators to focus on new product development while realizing their full market potential.

## Delivering Optimized Product Realization Solutions

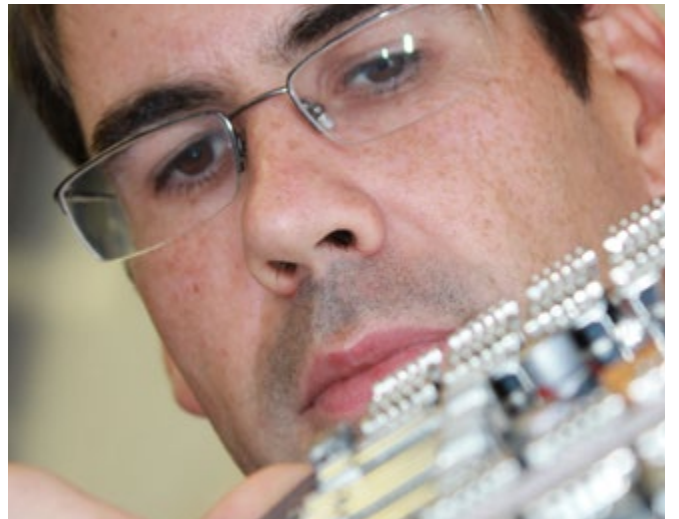

Turning ideas from concept into mass production with Idneo and SMTC, the '**Innovators Advance**' program is exclusively dedicated to partnering with leading edge companies. We help innovators turn their product ideas into reality by leading the advancement of concept & design, product development & compliance, quick turn prototyping, rapid manufacturing and supply chain strategies to launch new products and technologies into the market.

Our '**Innovators Advance**' program is an accelerated business model that enables Idneo and SMTC to meet the unique design and development needs of every customer, while providing the security and confidence of a global manufacturing partner. We provide the complete product realization solution to help customers reach their full market potential.

## Innovative Value Proposition

- **NPI Technology Center** located in the heart of Silicon Valley, San Jose.
- **Concept and Design services** with technical expertise who understand
- **Full product development** and product compliance to certify the safety of the product into its natural environment
- **Quick Turn Prototyping and NPI** for the launch and deliver of a quality first-product to market quickly and safely scale to mass production
- **Product stabilization** for mass production
- **Seamless Transition Gateway to Low Cost region** for higher volumes
- **The security and confidence** of a committed world-class supply chain
